

## Blood Donation Program 2025

As part of Aimstral Sdn. Bhd.'s continuous commitment to Environmental, Social, and Governance (ESG) principles, the company proudly organized a Blood Donation Program in 2025 at the Blood Bank, Sarawak General Hospital (SGH) in collaboration with Meditel Group.

This meaningful initiative was designed to support national healthcare needs by encouraging employees and the public to participate in voluntary blood donation. Through this effort, Aimstral Sdn. Bhd. aimed to help increase blood supply availability, promote awareness of the importance of regular blood donation, and inspire employees to actively contribute to social responsibility initiatives beyond the workplace.

The program successfully brought together 60 participants, including Aimstral employees and members of the local community. The campaign not only strengthened community engagement but also reflected Aimstral's dedication to fostering social impact, health awareness, and corporate volunteerism.

Aimstral Sdn. Bhd. extends its heartfelt appreciation to the management, organizing committee, and participants for their invaluable contributions to the success of this event. The company remains committed to continuing such CSR initiatives that support community well-being and national health objectives.

We were honoured to have a special blood donor with the rare A-Blood type. This blood type is considered special because it's rarely found, has limited compatibility, and highly valuable donor.
